

Scope of Work (SOW)

Kinan Customer Mobile Application – 2026

1. Purpose

Kinan International Real Estate Development Co. seeks proposals from qualified mobile application development companies to design, develop, and implement a comprehensive customer-facing digital application aimed at enhancing the customer journey across multiple service areas, including:

- Customer Service & After-Sales Support
- Sales & Marketing Engagement
- Community & Resident Services

2. Project Scale & Target Users

The application will serve Kinan's current customer base across its residential projects, as outlined below:

- Total Units / Target Customers Currently: 943 Users
- Internal Employee Accounts: 20 accounts (subject to increase based on operational requirements)

The proposed solution must be scalable to accommodate future projects and additional units.

3. Scope of Work

The selected vendor will be responsible for end-to-end project delivery, including:

- UI/UX Design
- Mobile Application Development (iOS & Android)
- Testing and Quality Assurance
- Deployment and Go-Live Support
- Ongoing Maintenance and Technical Support

3.1- Customer Services Module

This phase focuses on after-sales support, warranty services, and customer care.

Key Requirements:

Integration with Kinan CRM System and Power BI (Inbound, outbound)

- Maintenance & Warranty Ticketing System (Initiated / Under Process / Closed)
- Photo and Attachment Upload within Tickets
- Unit Document Downloads (Layout, Floor Plan, Building Permit)
- Loyalty Program Page (through which we provide discount coupons to customers).
- Customer Satisfaction Surveys
- Push Notifications
- Feedback & Review Management
- Complaint Submission Portal
- User Behavior Tracking and Analytics
- Real-Time Management Dashboard

General Requirements:

- Full Arabic & English Language Support
- Application branded in alignment with Kinan corporate identity
- Secure login with Face ID / Biometric Authentication
- The solution must be designed with scalability and future integration capabilities, including the ability to connect with additional digital channels and tools such as:
 - WhatsApp Business / Meta integrations
 - Kinan corporate website and digital platforms
 - AI-powered customer service and automation tools
 - Any future third-party systems or business requirements

3.2 Marketing & Sales Module

This phase supports the customer purchasing journey and digital sales engagement.

Key Requirements:

- Sales Center Visit Appointment Scheduling
- Marketing Materials Library (Brochures, Campaign Content)
- In-App Banner Ads and Startup Promotional Messages
- Multimedia Support (Videos, Photos)
- Product Listings for Sale (Land, Villas, Apartments)
- Detailed Product Pages (Location, Plans, Photos, Videos)
- Reservation and Down Payment Workflow
- Identity Verification and Payment Receipt Upload
- Digital Reservation Form and E-Signature
- Remaining Balance Deadline Tracking with Automated Reminders
- Contract Issuance Upon Full Payment Completion
- Ownership Transfer Appointment Scheduling
- Sales Team Call and Visit Booking
- Show Unit / Model Visit Scheduling
- Construction Phase Visit Scheduling

3.3 Community Module

This phase enhances resident lifestyle services and community operations.

Key Requirements:

- Common Area Ticketing System
- Access Requests (Main Gate, Parking)
- Visitor Access Management
- Facility Booking (Gym, Reception Hall, Cinema, Nursery, Amenities)

- Paid Community Service Requests and Online Payments
- Community Area Guide
- Access to Community Cameras and Live Construction Feed (if applicable)
- Interactive Project Navigation Maps
- Bicycle and Pedestrian Routes
- EV Charging Parking Requests
- Reviews, Comments, and Suggestions Section
- Community Events and Updates
- Ability to request maintenance for the residential unit through a third party.

With full flexibility to separate the Community Module at any future time from the Kinan application, allowing it to become an independent standalone community-focused application, while fully preserving all data recorded since the platform's initial launch. Accordingly, the application will be designed and developed from the outset based on this approach and adopted as the foundation for implementation.

4- IT Compliances & Security

1. Solution Architecture	
Delivery Model	Dedicated single-tenant solution (not shared SaaS)
Architecture	Microservices-based with modular components
Frontend	Flutter (cross-platform: iOS, Android, Web from single codebase)
Backend	Node.js (Express/NestJS) or Python (FastAPI) RESTful APIs
Database	PostgreSQL (cloud-agnostic, runs on Azure & GCP)
API Gateway	Azure API Management or GCP Apigee / Cloud Endpoints
Containerization	Docker via Azure AKS or GCP GKE
2. Source Code & IP	

Code Handover	Full source code (frontend + backend + APIs) delivered to KINAN
Repository	Git repository with full commit history
IP Ownership	KINAN owns all source code and IP outright
Documentation	API docs, DB schemas, deployment guides, developer onboarding
Proprietary Deps	Vendor to disclose any licensed/proprietary components
3. Hosting & Infrastructure	
Cloud Platform	Microsoft Azure or Google Cloud Platform (GCP)
Compute	Azure App Service / AKS or GCP Cloud Run / GKE
Database	Azure Database for PostgreSQL or GCP Cloud SQL (PostgreSQL)
Storage	Azure Blob Storage or GCP Cloud Storage
CI/CD	GitHub Actions (cloud-agnostic) or Azure DevOps / GCP Cloud Build
Data Residency	All data hosted within KSA region (Azure or GCP)
4. Identity & Access Management	
End-User Auth	Microsoft Entra External ID (Azure AD B2C) or Google Identity Platform
Internal Auth	Microsoft Entra ID with SSO or Google Workspace Identity
Protocols	OpenID Connect / OAuth 2.0
5. Integration Requirements	
ERP	Oracle Fusion ERP (financial & operational data)
Property Mgmt	Yardi Voyager
Analytics	Microsoft Power BI dashboards & reporting
Automation	Microsoft Power Automate workflows
Payments	SADAD, Mada, Apple Pay, STC Pay
Notifications	Firebase Cloud Messaging (Android) + Apple Push Notification (iOS)

API Standard	RESTful APIs with webhook support for real-time events
CRM	Microsoft Dynamics 365 CRM (customer relationship management & service)
6. Support & Knowledge Transfer	
Knowledge Transfer	Training sessions for KINAN team on codebase & deployment
Warranty	Vendor to propose warranty period post go-live
Support Model	Tiered SLA support with defined response times
Team	Vendor to propose team: developers, QA, PM, architect
7. Security & Compliance	
Legal & Hosting	Provide full registered legal name and country of incorporation Confirm hosting in KSA (cloud provider + region)
Compliance	Provide ISO 27001 or SOC 2 Type II certification Confirm no major regulatory violations or cybersecurity breaches in last 5 years (Yes/No)
Data Protection	List all personal data processed (Customers & Employees) Encryption in transit (TLS 1.2+ mandatory) Encryption at rest (AES-256 mandatory) Confirm no cross-border data transfer (or provide safeguards)
Payment Security	PCI-DSS compliance OR certified payment gateway used Confirm no raw card data stored on servers Confirm tokenization mechanism implemented Provide latest penetration test report (Mobile + API) Provide remediation confirmation for findings
Access Management	MFA required for admin access & Security login for customers Audit logging enabled for admin actions

5. Supported Platforms

The scope includes development and operation of:

- iOS Mobile Application
- Android Mobile Application

- Web-Based Admin Dashboard
- Customer Web Portal matching the mobile app interface and providing the same core services via browser
- Integration Layer with CRM and Power BI

6. Service Level Agreement (SLA)

5.1 Working Hours

- Standard Support: Sunday–Thursday, 9:00 AM – 6:00 PM (KSA Time)
- Critical Support: 24/7 availability for high-severity incidents

5.2 Severity Levels

- Severity Level Model (L1–L4) through the ticketing system

5.3 Reporting & Monitoring

- Weekly ticket summary reports
- Monthly SLA compliance reporting
- Root Cause Analysis (RCA) for critical incidents
- Continuous improvement recommendations

7. Vendor Resource Requirements

The vendor must provide:

- Dedicated Project Manager
- iOS and Android Development Team
- Backend & Integration Specialist
- UI/UX Designer
- QA & Testing Team
- Optional Arabic-speaking resources
- Clear escalation and governance model

8. Contract Duration

- Contract duration: 12 months
(Including development + maintenance and support coverage)

9. Proposal Evaluation Criteria

Proposals will be evaluated based on:

- Relevant experience in real estate mobile applications
- Expertise in CRM
- Strength of customer experience and UX capabilities
- Support model and SLA compliance
- Cost effectiveness
- References from similar projects within Saudi Arabia
